

Dear Parents,

The phrase for this month that we are focusing on is “on purpose.” There are so many things that we give priority to and make sure that we are intentional about. Is spending time with your teenager one of those things? Are you “on purpose” or intentional about scheduling a specific time with your teen with no outside distractions? Do you think your teenager even cares?

Take a moment if you will and watch this video about what our teenagers think about spending “on purpose” time with their parents. It might just surprise you!
